ATTIC INSULATION

Heat Rises !! ...unless your attic is insulated - then you get to keep it.

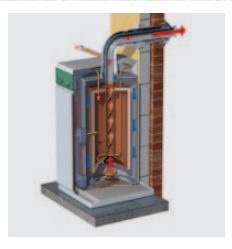

Talk to us about grants for attic insulation.

HIGH EFFICIENCY OIL/GAS BOILERS

If cars were like condensing oil and gas boilers they would get 200mpg.

Talk to us about evading the carbon tax, and how to get a grant for a new boiler.

HEATING CONTROLS

Take back control of your home heating system from a clock that knows nothing about you, your home or the weather. A grant is available for installation.

HEAT RECOVERY VENTILATION

There is no grant for installing Heat Recovery Ventilation - By way of compensation they will transform your indoor air quality.

SOLAR PANELS

Talk to us about the best and most economic option for achieving low cost hot water heating in all seasons, and how to get a grant towards the installation.

System and Installer Certification

Ensen are trained installers of the **Baumit** External Wall Insulation system (EWI).

Ensen are **NSAI** registered external wall insulation contractors, **NSAI** contractor number **181**.

Baumit external wall insulation is certified by NSAI (Irish Agrément Board) Certificate number **09/0336**

Baumit holds current **European Technical Approval (ETA)** certificates for the complete system in accordance with the internationally recognised **ETAG 004** Guidelines for Technical Approval of External Thermal Insulation Composite Systems with Rendering in addition all system components are fully certified in the relevant **EN standards**.

For a free quote or advice on External Wall Insulation (EWI) or any of our other products or services provided by ENSEN please feel free to contact us.

KEEP YOUR HOME WARM
EVERY WINTER

What is EXTERNAL Wall INSULATION?

External wall insulation offers by far the simplest and most reliable and effective solution for improved insulation the thermal performance of your house.

By wrapping your home in insulation, heat loss is dramatically reduced and the living environment is significantly improved.

System Description

- 1. BACKGROUND** >> Suitable for existing or new concrete, masonry or rendered surfaces.
- 2. ADHESIVE & FIXINGS** >> A highly polymerised cementitious dry mortar is used to bond the insulation to the background. For additional security, supplementary mechanical fixings are used.
- 3. INSULATION BOARDS** >> The insulation specification is selected to ensure optimum performance on every project type. The Baumit system includes expanded polystyrene (EPS), mineral wool and phenolic boards.
- 4. REINFORCED BACKING COAT** >> A base coat of highly polymerised cementitious dry mortar embedded with alkali resistant glass fibre reinforcing mesh to provide mechanical stability, flexibility and enhanced durability.
- 5. ACCESSORIES** >> The fully certified system includes with all necessary beads, trims and ancillary components.
- 6. FINISHES** >> Thin coat high performance Baumit renders are weather resistant and vapour permeable. They afford virtually unlimited scope for styling the façade in an extensive range of colours and textures. Additional finish options include ceramic brick slips.

Advantages of EXTERNAL Wall INSULATION...

- ✓ Cuts heating costs!
- ✓ Improves internal living comfort!
- ✓ Transforms the building's appearance!
- ✓ Reduces greenhouse gas emissions and protects the environment!
- ✓ Adds to the value of your property
- ✓ Improved Building Energy Rating
- ✓ Getting maximum benefit from the thermal storage capacity of the structure.

SUPERIOR PERFORMANCE >> External wall insulation has a considerably superior performance to alternative systems without any of their disadvantages such as thermal bridging, condensation, installation difficulties. With External insulation you can see exactly what you are getting and the improvement can be measured.

TECHNICAL SUPPORT >> Ensen have assembled a teams of experienced installers complemented by our technical team who can advise on the most appropriate options should you decide on the best method of improving the thermal performance of your home.

History of BAUMIT

Baumit brings the very best of European expertise in External Wall Insulation (EWI) right to your home.

Baumit are pioneers in the field of external wall insulation systems and have almost 40 years' experience in European market, Baumit supply over three million sq.m of external wall insulation annually.

GRANTS Now Available!

With substantial financial support available under the Irish government grant scheme there has never been a better time to install external wall insulation.

A €4,000 Grant is available for External Insulation from the "Sustainable Energy Authority of Ireland" under their Home Energy Saving Scheme (HES) for more information on this please go to www.seai.ie or contact ENSEN.

This is the largest grant ever available to home owners in Ireland.
